Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu (US 6,190,977) in further view of Hori et al. (US 5,320,974).

Wu discloses the steps of :

For claims 1-3, 5, 6, 8 and 10:

providing a gate oxide and gate;

performing a source/drain extension implant (30, fig. 4);

forming spacer on the gate;

performing epitaxy to form raised source/drain regions (26, fig. 5); and

forming a silicide (32 a,b, fig. 7) on the gate and source/drain regions (col. 5, ln. 5

– col. 6, ln. 37).

3. Wu discloses the claimed invention except for the limitations disclosed below by Hori.

For claims 1, 4, 5, 9, 10 and 11:

removing the spacer (fig. 1C);

performing a halo implant (10 a, b, fig. 1C) (col. 6, ln. 50 – col. 7, ln. 11).

Art Unit: 2812

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Hori with Wu, because the halo implant decreases the parasitic junction capacitance.

4. Wu and Hori disclose the claimed invention except for the vertical implant depth of either the source/drain extension or the halo. However it would have been obvious to one of ordinary skill in the art at the time the invention was made to implant the dopants at the claimed ranges of depth, for claims 2, 4, 5, 9 and 10, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. Also, the examiner takes *official notice* that it is well known in the art to remove a spacer with a wet chemistry. Therefore the limitation of claim 7, hold no patentable weight that is not already known to those of ordinary skill in the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron E Pompey whose telephone number is (703) 305-3016. The examiner can normally be reached on flex schedule.
